

As an American Citizen I enjoy listening to my XM radio of which i pay for every month. I listen to XM's various different channels including the very informative Traffic and weather channels. XM provides excellent programming that isn't available on the regualr FM spectrum. I don't think the National Association of Broadcasters should have ANY say in what I listen to ... especially if I pay for it I respectfully ask that the FCC reject the NAB's petition 04-160. Let XM be able to provide the programming that WE the listeners/subscribers want ...

Thank You
